

How to Recognise Phishing Scams Emails

What is phishing?

Phishing is a scam where criminals pretend to be trusted people or organisations to steal:

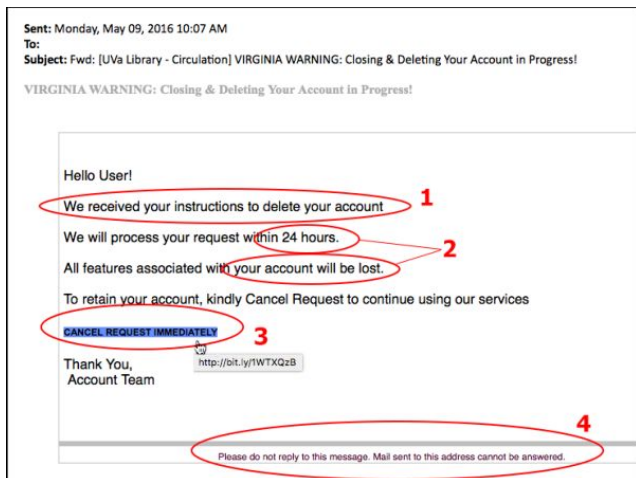

- passwords
- bank details
- personal information
- money

Common examples:

- Fake bank emails
- Fake parcel delivery messages
- Fake Microsoft or Apple alerts
- Scam phone calls pretending to be support staff

Warning Signs

Urgent language

- “Your account will be locked!”
- “Act immediately!”

Suspicious links

- Weird website addresses
- Misspelled company names

Requests for personal information

- Passwords
- Credit card details
- Verification codes

Poor spelling or grammar

Unexpected attachments

Example Scam Message

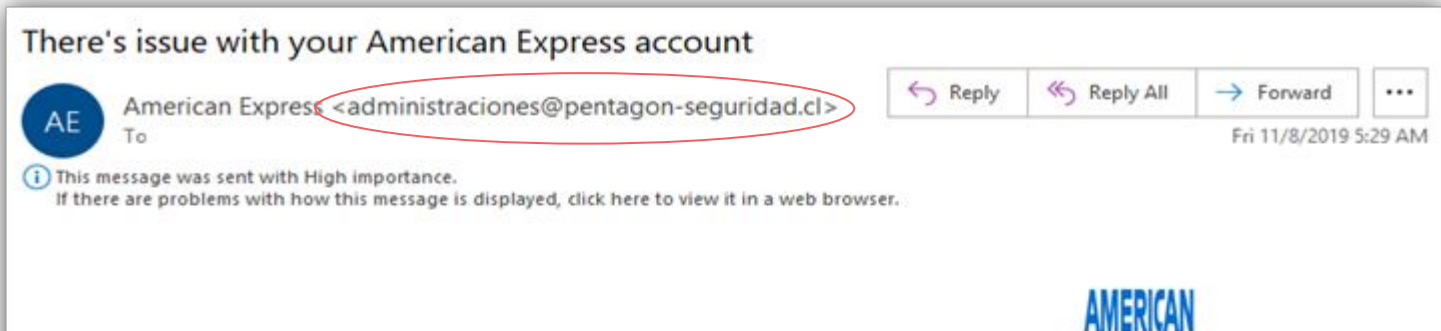

“Your package delivery failed. Click here to pay a small fee.”

Why it's dangerous:

- Fake delivery company
- Link leads to scam website
- Tries to steal bank details

Safer action:

- Go directly to the official website
- Never click suspicious links

How to Protect Yourself

✓ Stop and think before clicking

✓ Check the sender carefully

✓ Never share passwords by email/text

✓ Use strong unique passwords

✓ Ask family/friends if unsure

What To Do If You Think It's a Scam

DO:

Delete the message

Block the sender

Report the scam

Change passwords if clicked

DON'T:

Reply to the scammer

Click links
